We weren't aware that ODA's Rose K. was on the POM until now but Linda just confirmed it. This is great news as Rose is excellent and very knowledgeable on pesticide issues affecting states. I don't think she's been too involved in the Pitchfork issue, but could probably provide an overview if needed. Rose said she didn't know she was on the agenda or for how long so coordination with her is needed to let her know. I certainly have no issues with OPP providing an update on the petition status.

Scott Downey, Manager Pesticides and Toxics Unit US EPA Region 10 1200 6th Ave, Suite 900, OCE-084 Seattle, WA 98101-3140 (206) 553-0682

RE: SFIREG/POM agenda for September

I defer to Scott, but I believe Joel or I can speak if needed. By Rose, do you mean Rose Kachadoorian (sp?)? I have spoken to her on unrelated issues and she seems very able.

History:

This message has been forwarded.

Good afternoon,

Just a reminder about the meeting on Friday, September 23rd with Syngenta toxicologists regarding atrazine. The meeting will be from 3pm to 5pm. We're still waiting to confirm the location based on who will attend the meeting. Once we've determined a convenient central meeting point we'll be back in touch with logistical information. Please let me know if you are available to attend as soon as possible.

We believe this will be an excellent opportunity to have a productive scientific exchange. Not only would we like to present you with the latest and most relevant atrazine data, we would also like to discuss any specific areas you are interested in and answer any questions you may have.

Again, thank you to Gail and Jae for getting the ball rolling. As per Gail's request, we will work on getting some information to you all prior to the meeting.

Thank you and I look forward to hearing back from you!

Kind regards,

Danelle

Subject: Meeting request

Dear Richard, Gail, Jae, Dale, Scott, CAPT Kauffman and Elizabeth,

Thank you for taking the time to meet with members of the natural resources community recently on the state's planned exposure investigation in Lane County, Oregon. The information you shared and your responsiveness to questions was appreciated.

As discussed at the meeting, we would like to formally offer to have our toxicologists meet with you, the toxicologists consulting with the Pesticide Analytical Response Center (PARC) and the scientists in your departments. The purpose of the meeting would be to have a scientific exchange of exposure data on atrazine. As you may know, there are over 6,000 studies on atrazine. Of these, our toxicologists will be able to provide the most relevant data and studies, including human studies. We believe a direct exchange between the scientists will allow for a productive discussion about data and information that

can help with the interpretation of urinary detections of atrazine metabolites.

I will be happy to arrange a meeting with our toxicologists either in person in Salem, or over the phone, whichever is most convenient. We look forward to a robust exchange of information with you and your colleagues soon.

I look forward to hearing from you.

Kind regards,

Danelle

Hi Danelle,

thanks for the check-in. I will plan to attend. Kay Morrison from EPA here in Seattle will also be attending. To this point, we presumed the meeting would be at OHA in Portland, but I can also check the availability of the large conference room at EPA's Oregon operations office, which is located right next to Pioneer Square in downtown Portland.
